SURFACE PREPARATION

Provide clean, sound substrate. Remove all grease, scale, dirt, and rust on the steel and/or concrete surfaces to receive tape using abrasive blasting or wire brush. To assure adhesion, the surface must be clean, dry, and free of grease.

APPLICATION

Peel back interleaving and apply adhesive side of the tape to the surface and press down. Ensure that all seams and overlaps are pressed out and adhered. A top coat can be applied immediately after BD Butyl Tape PE is installed.
